Toddler Communication Research Project

Is **YOUR**
child between
6 and 18 months?

Would you like
to know how your
child's communication
is developing?

*If so, then take part
in this unique project.*

This is a joint project between
NHS Lanarkshire Speech & Language
Therapy Department and
Glasgow Caledonian University

We are interested in the way your
child communicates with you.

Taking part in the project means we
will ask you to fill in a checklist every
3 months until your child is 2 years old.

If the checklist shows us your child
is not doing something we think he
should be doing we will tell you and
ask if you would like us to assess
your child in more detail.

Benefits to you & your child:

- ◆ Your child's communication will be monitored at an important stage of their development
- ◆ Advice & ideas to encourage communication development
- ◆ Any problems will be identified and treated earlier than normal

If you would like to participate in
the project then please complete the
form (opposite), fold and secure the
sides and either hand to any member
of staff at any NHS Lanarkshire centre
and they will send it to me, or post it
normally (but it will require a stamp).

If you would like to know more about
the project before deciding you can
contact me directly:
